Education

Plan learning spaces around the relationship between presenter, content and audience. Bring display, source distribution and control requirements into one project brief.

View the current online brochure

Keep the learning workflow visible

Map the teaching scenarios

Define how teaching material is presented, which sources are used and how participants interact in the room and remotely.

Connect the room

Review the source locations, display positions and signal paths. Compare extension and distribution products with the installation requirements.

Support repeatable operation

Plan the room controls and the steps educators need to take. Confirm any conferencing platform and device integration separately.

What to bring to the project discussion

• Your source devices, content types and daily workflows.

• Display locations, room dimensions and viewing conditions.

• User access, network and integration requirements.

• Installation constraints, support expectations and the project schedule.
